Supplement of

Linking biogeochemistry to hydro-geometrical variability in tidal estuaries: a generic modeling approach

Chiara Volta et al.

Location of published estuarine biogeochemical model applications ($n=51$) and their distribution amongst different climatic zones. Red, blue and green dots correspond to locations in which 1, and less than 5 or more than 5 model applications have been published, respectively. The limits of the temperate zones ($30^\circ < \text{lat} < 60^\circ$) in either hemisphere are highlighted in red.
