

Table S1. Global land drought events (GLDEs) according to SoilClim model.

This is a result of an algorithmic, density-based clustering of drought grids based on their spatiotemporal position. The algorithm does not evaluate whether nearby GLDEs occurring at the same time were caused by one large-scale climatic event or not.

spatiotemporal order	continent	start	end	n. o. decades	max. area of GLDE (km ²)	spatiotemporal category	dynamic order	dynamic category
