

Interactive comment on “Establishing the dominant source of uncertainty in drought indicators” by G. Naumann et al.

S. Maskey (Editor)

s.maskey@unesco-ihe.org

Received and published: 12 February 2014

Dear authors,

Two reviewers have evaluated your manuscript. While both reviews are positive for publication of the manuscript in HESS, they are concerned with the title of the manuscript, in particular about the use of the word ‘uncertainty’ in the title. I share the concern of the reviewers, but happy to see that you have proposed – in your response to the reviewer comments – a more suitable title for the manuscript: “Comparison of drought indicators derived from multiple datasets over Africa”. In addition, both reviewers provided number comments/suggestions that are important to improve clarity and precision of your manuscript.
