Interactive Comment

## Interactive comment on "Drought evolution characteristics and precipitation intensity changes during alternating dry-wet changes in the Huang-Huai-Hai River basin" by D. H. Yan et al.

## J. Agwata (Referee)

agwatas@gmail.com

Received and published: 22 April 2013

The manuscript is well written and should be considered for publication in the Journal. The abstract however needs to have clear objectives of the study while the key conclusions and recommendations arising from the study findings need to be included.
