Correction to Equation (D3)

On the right hand side of the equation, the first term, $S(0)$, denoting the initial storage, is redundant. This is inferred from $Q(0)$ by said equation at time zero.

Except for the absence of a storage limit, either S_m (for a minimum storage) or S_c (the storage capacity), Eq. (D3) is identical to both Eqs. (5a) and (5b).
