

Interactive comment on “Forecasters priorities for improving probabilistic flood forecasts” by F. Wetterhall et al.

F. Wetterhall et al.

fredrik.wetterhall@ecmwf.int

Received and published: 19 June 2013

Sincere apologies for not immediately engaging in the discussion of the paper. We were anticipating to respond with a concerted reply but the recent floods in Europe threw us somewhat off the course since many of the authors are involved in the European Flood Awareness System as well as their national forecasts systems. We apologize for the delay and are delighted that the discussion has been opened again to allow the reviewers to respond to our comments.
