I think this is an interesting and well structured manuscript. It reinforces and extends our findings in the context of the uncertainties related to the observational datasets employed to evaluate climate models. We summarized them in a paper recently published that you may have not noticed:

<http://onlinelibrary.wiley.com/doi/10.1029/2012GL054206/abstract>

In this article, we deal with the same topic you develop here, use a very similar methodology, and draw the same main conclusion: the necessity of taking into account uncer-
