Dear Prof. Nunzio,

Followed by referee comments, I received a notice from the journal that I have a time frame until August 27 for revisions. Therefore, I already started revising the manuscript considering all the referee comments and this includes descriptive answers for all the questions raised by the referees. I can post the answers towards the end of this week since I was extremely busy during the past few weeks due to other commitments. So,

C3807

I kindly request you to provide that time frame for the revisions.

Thanks.
