Received and published: 12 August 2013

Thanks to the authors already for this important clarification!

The two referees and the one contributed comment (also originally an appointed referee), are generally positive, but raise a number of further issues, some of which are clarifications. Since authors have to post an online reply to each comment separately anyway, before further decisions can be made, I would like to encourage you to do this as soon as possible to perhaps stimulate some replies from the referees again.

Regards, Kerstin Stahl
