

## ***Interactive comment on “The June 2013 flood in the Upper Danube basin, and comparisons with the 2002, 1954 and 1899 floods” by G. Blöschl et al.***

### **Anonymous Referee #1**

Received and published: 8 September 2013

The paper is comprehensive and well written. I recommend acceptance of the paper, subject to minor revisions.

I list only some types and make a few suggestions for improvements below.

Page 2 Line 26 Reference Versicherungsjournal (2013) is not adequate. The web site can be change and information can be deleted. The authors should improve the introduction section with a related work. Besides, they should explain what the other researchers concluded about floods in the Danube basin. Page 3 Line 16 The sentence “The magnitude of the June 2013 flood has been enormous.” is subjective and should

C4728

be moved in section 5.2.
