

Interactive comment on “Estimating annual effective infiltration coefficient and groundwater recharge for karst aquifers of the southern Apennines” by V. Allocca et al.

F. Fiorillo

francesco.fiorillo@unisannio.it

Received and published: 9 October 2013

The manuscript is a useful contribute to evaluate the infiltration and recharge on karst massifs based on regional scale and on long annual mean scale. It should also consider the below article (online free), which deals with estimation of the evapotranspiration amount and of recharge processes on the Cervialto and Terminio karst massifs (also used by Authors).

Fiorillo F. (2011) - The Role of the Evapotranspiration in the Aquifer Recharge Processes of Mediterranean Areas – In “Evapotranspiration, From Measurements to
