

Interactive comment on “Impacts of human activities and climate variability on green and blue water flows in the Heihe River Basin in Northwest China” by C. Zang et al.

M. Sivapalan (Editor)

sivapala@uiuc.edu

Received and published: 17 November 2013

I apologize to the authors: today I tried to go through the entire discussion in order for me to make an editor comment on how to proceed. Unfortunately, I am unable to open/read the author responses to the reviewers. There must be a system problem - I will get Copernicus to fix this on Monday and I will post my editor comment (Part 2) after that. M Sivapalan
