Interactive comment on “Impacts of climate variability on wetland salinization in the North American Prairies” by U. Nachshon et al.

U. Nachshon et al.

uri.nachshon@usask.ca

Received and published: 29 January 2014

We highly appreciate the review of Dr. Goldhaber which was positive and encouraging in respect to the paper goals, concept, and its contribution to the understanding of the North American wetlands salinization processes. On the other hand the reviewer had some major concerns regarding several issues raised in the paper and we will reply to these comments in the attached file.
