## ***Interactive comment on “Does consideration of water routing affect simulated water and carbon dynamics in terrestrial ecosystems?” by G. Tang et al.***

**N. Basu (Editor)**

nandita-basu@uiowa.edu

Received and published: 19 February 2014

Dear Dr. Tang: Could you provide us with a point-by-point response to the review comments? Based on the recommendations for major revisions, the paper might have to sent out for re-review, and it is often much easier to go through that process if you have a point-by-point response.

Thanks

Nandita Basu
