Interactive Comment

## Interactive comment on "Effects of land-conversion in a biosphere—atmosphere model of Northern South America – Part 2: Case studies on the mechanisms of differential hydrometeorology" by R. G. Knox et al.

## P. Regnier (Editor)

pregnier@ulb.ac.be

Received and published: 13 April 2014

After reading through the author's comments in response to the reviewer's evaluation, I believe that their proposal to restructure the two original ms. into a single one and reshaping the submitted part 2 as described in their rebuttal is suitable.

This implies major changes in structure and content of the paper and I thus recommend that, once resubmitted, the revised ms. is sent back for review.
