

Dear Dr. Thom Bogaard / reviewers,

We would like to inform you that our manuscript, which is now entitled “New method for assessing the susceptibility of glacial lakes to outburst floods in the Cordillera Blanca, Peru” has undergone major revisions. According to the suggestions and comments of the reviewers in the HESS Discussion, we have performed a number of changes, which are related especially to the:

- 1) terminology (avoid such terms like “potential hazardousness” and “objective”)
- 2) more detailed explanation and discussion of equations used (e.g. in sections 2.3.2, 2.3.4, ... and new section 4.1)
- 3) complete or partial reworking of some sections (e.g. Abstract, 1.2, 2.1, 5)
- 4) creation of new sections (e.g. discussion section 4.1)
- 5) update and extension of references cited in the text
- 6) English correction by a native speaker

Please note that the chapter and table numbering has changed. For a detailed description of the individual changes, please see our responses in the HESS Open Discussion (<http://www.hydrol-earth-syst-sci-discuss.net/11/2391/2014/hessd-11-2391-2014-discussion.html>). We hope that all these revisions will satisfy the reviewers.

Yours sincerely,

Adam Emmer, Vít Vilímek
