Received and published: 9 May 2014

Dear Auhtors and Editors,

I read this joint editorial with great pleasure because it reflects on a core of subject of science: the journal publication. In the following I'd like to share my personal concerns (see supplement) that the 'publish or perish system' is in danger to ruin itself and how we jointly might mitigate this risk by small changes of our community codex.

Best regards and thanks to all Editors for this initiative,

Erwin Zehe
