Received and published: 2 December 2014

Dear Editor, The manuscript was revised based on the valuable comments from three anonymous referees. Please find as supplement the resulting changes on the manuscript in track changes. Efforts were made to make the manuscript more concise and better explain the methods used to achieve objectives of the paper. The discussion section was strengthened, as well as the conclusions, based on the suggestions of referees. References were added to make some arguments stronger, for example on the discussion regarding the impact of dams and flow regulation.

Please also note the supplement to this comment:
