

## ***Interactive comment on “Technical Note: A simple generalization of the Brutsaert and Nieber analysis” by T. L. Chor and N. L. Dias***

**T. L. Chor and N. L. Dias**

nldias@ufpr.br

Received and published: 16 December 2014

We would like to refer the readers of this comments, the editorial office, and the reviewers to our attached pdf file. We concentrated all our answers in that file, because we believe it is easier to argue about all questions raised by the reviewers in this way.

We thanks the comments by the reviewers, and we believe that the additional simulations run by us, and the new figures, give adequate answers.

With best regards,

the authors.
