

## ***Interactive comment on “Millennial scale variability in high magnitude flooding across Britain” by N. Macdonald***

**Dr Macdonald**

neil.macdonald@liverpool.ac.uk

Received and published: 16 January 2015

I would like to thank the reviewer for their insightful comments and will address a number of the questions stated, with a more full and complete explanation to be provided within the revised version. Specific points addressed below, questions of clarity or greater detail will be addressed in a revised version:

The abstract will be strengthened to reflect the greater discussion of the results

P10159 L9, The statement relates to Britain, with recognition given to other European studies within the cited papers (e.g. P10164 L19 & 21).

Methodology – this will be clarified in the revision and the reviewer’s comments ac-

C6104

cepted and appreciated.

P10161 L9, each station

P10163, a table will be added to the revision

P10166-10167 I thank the reviewer for the comments here, and will endeavor to add more detail to the analysis, particularly in respect to the seasonality of events.
