Received and published: 20 January 2015

To the editor,

Please find attached to this comment a revised version of the manuscript having addressed the corrections suggested by each reviewer.

In particular, please note the reordering of sections as suggested by Prof Cartwright - we decided not to maintain the original ordering of the results and discussion section as previously stated in our response to this review.

Also of note, figure 1 has been deleted, figures 8 and 10 in the original submission C6145

have been switched, and figures 3 and 11 have been combined.

Best regards, Joshua Dean (on behalf of all co-authors)

Please also note the supplement to this comment:
