

Interactive comment on “Multi-annual droughts in the English Lowlands: a review of their characteristics and climate drivers in the winter half year” by C. K. Folland et al.

Anonymous Referee #2

Received and published: 23 February 2015

I had a first reading of the paper, in general it is very good, and even if I would need to read more carefully, I can already say that it can be accepted for publication in HESS.

I do not think I will be able to submit a complete revision before the 25th of February. Please, if you think that the paper can be already published, for me it would be fine.
