

Interactive comment on “Virtual laboratories: new opportunities for collaborative water science” by S. Ceola et al.

F. Laio (Editor)

francesco.laio@polito.it

Received and published: 1 March 2015

The manuscript has been considered by two referees, who were substantially satisfied with the quality of the manuscript, but proposed some changes to improve its readability and breadth. The Authors demonstrated a very constructive attitude toward the reviewers' comments, modified the manuscript at some points, and carefully responded to all comments. I therefore would like to invite the authors to proceed with the revisions and submit the revised version of the manuscript.
