

Tables

Table S1: Number of available data points, smallest- and largest-spatial-lags, and minimum (min.), mean, maximum (max.) and coefficient of variation (CV) of annual total precipitation in hydrological wet days (PRCPTOT) in Bangladesh for each time step (year) within 1948-2007 series.

Figures

Figure S1. Spatial location of the data points (rain-gauge) where precipitation observations were available for each year and computed annual total precipitation in hydrological wet days (PRCPTOT) value (in mm).

Figure S2. Statistically significant change points in the spatial correlations of annual total precipitation in hydrological wet days (PRCPTOT) along the longitudinal (left) and latitudinal (right) gradients within the 1948-2007 series.

Table S1: Number of available data points, smallest- and largests-spatial-lags, and minimum (min.), mean, maximum (max.) and coefficient of variation (CV) of annual total precipitation in hydrological wet days (PRCPTOT) in Bangladesh for each time step (year) within 1948-2007 series.

Year	Available number of data points	Spatial lag(km)		PRCPTOT (mm)			
		Smallest	Largest	Min.	Mean	Max.	CV
1948	8	95.38	489.85	494	1532	3028	53.59
