

Dear Editor and authors,

I appreciate the effort authors have done to acknowledge the review comments. In particular, adding data in fig. 8 and modifying the discussion gave more credibility in relevance of the study to regional water management. The revision has addressed well the minor changes requested. I found a couple of typos (p13r19, p20r2(table nro), p21r26&27).

Thank you for the opportunity to review this interesting and carefully conducted scientific work!
