

Review HESS-2015-69

Dear Editor of Hydrology and Earth System Sciences

Dr. Frans van Geer

I uploaded all the files needed for the production process. I included the supplementary information and corrected the problem in figure 5.

We want to thank a lot to you and the reviewers for your work that improved our manuscript, to the HESS Chief Editor that granted this paper with a full waiver, and all the workers of Copernicus Publications, that help a lot in this process.

Kind regards and best wishes

Guillermo Goyenola
