Thanks for your reminding. We are exploring the recent scientific advancements in other parts of the world and we will add more information about them in the revision version. It takes time.

I supposed we could response part of the comments in this Phase 1 (open discussion stage) and answer all the referee comments throughly in next Phase 2 (final response).

By the way, in Page 4989, there is a comment "They need to be finished." We don't understand what need to be finished. Could you please give us more information about this comment? Thank you!
