Received and published: 2 September 2015

We like to thank editor, Prof. Graham Jewitt, and the two anonymous reviewers for taking the time to critically review our manuscript hess-2015-60. We have thoroughly revised the manuscript and addressed the concerns of the reviewers. The manuscript has been improved greatly. Our response to the reviewer comments is included below in blue and the modified text in the manuscript are cited here in red. Changes in the manuscript itself are in blue. For clarity, we did not include the text taken out of the manuscript. During the time period in which we had to respond to the reviewers and change the manuscript, the senior author (Haimanote) defended his dissertation

C3431

and is moving with his family to a new position in Texas. Therefore in one case we indicated what change we would make and will do it after we pass this stage of the review process Thank you for your time and effort. With high regards Haimanote Bayabil and Tammo Steenhuis
