

Interactive comment on “South Asia river flow projections and their implications for water resources” by C. Mathison et al.

Anonymous Referee #2

Received and published: 10 September 2015

I have gone through the proposal to revise the present manuscript. I am satisfied with their proposal to take up the revision as suggested. I also accept the authors argument of non-availability of data. The authors will be discussing the global review work in their revision along with another suggested paper. I look forward to reading the revised manuscript incorporating all the comments/suggestions of reviewers and the Editor.
