

## ***Interactive comment on “Satellite signal shows storage-unloading subsidence in North China” by J. P. Moiwo and F. Tao***

**B. Schaefli (Editor)**

bettina.schaefli@epfl.ch

Received and published: 18 September 2015

I read the response to all reviewer comments carefully. After revision, the paper will go into a second round of reviews. The revised version should also account for a comment of reviewer one which the authors did not response to:

"Explanations on how the authors come to such large scale land subsidence estimations and how they interpolate GPS measurements are lacking."
