

## ***Interactive comment on “Initial assessment of a multi-model approach to spring flood forecasting in Sweden” by J. Olsson et al.***

**P. Krahe (Referee)**

krahe@bafg.de

Received and published: 18 September 2015

Dear Jonas, Dear Co-Referees,

I like the idea of Massimiliano to publish the paper as a Technical note. Furthermore, I subscribe the recommendation of Philippe, especially the idea to concentrate on the river basin Vindelälven.

If you take into account the comments of the referees, your documented scientific experiment will become a valuable contribution to stimulate the discussion and the development of seasonal forecasting services.

Best regards

C3764

Peter
