

Interactive comment on “Adaptation of water resource systems to an uncertain future” by C. L. Walsh et al.

D. Solomatine (Editor)

d.solomatine@unesco-ihe.org

Received and published: 12 December 2015

Dear authors, I would like to summarise what the 2 referees and one additional reviewer (with the short comment) have said - it is an interesting paper raising very important questions, but there are things to be clarified, better formulated, linked to the existing literature - before the paper can be recommended for publication. Referees have presented quite detailed comments and recommendations. I invite the authors to address these comments and to rework the paper accordingly.
