Dear Editor,

We acknowledge the valuable comments and recommendations to our manuscript during the open discussion phase. We are currently preparing our responses to the discussion. However, we have not been able to accomplish this task in the time frame allocated. We are therefore seeking an extension to the deadline for us to submit our responses. An extension of 4 weeks would allow us to complete a thorough preparation of our responses.

Discussion Paper

We have taken a considerable amount of time to complete tasks such as satellite image processing to improve our evapotranspiration estimation and soil analysis to estimate the wilting point. These tasks were necessary to fulfill recommendations regarding several areas of concern from the reviewers. We are hopeful that this extension can be granted in order for us to prepare concise and thorough responses.

R. Nobrega, on behalf of all authors
