Dear Editor,

We thank you, the anonymous reviewer and Rolf Hut for comments on our manuscript.

We have addressed the reviewers comments, in particular trying to focus on the “first way” suggested by R. Hut, i.e. on the tool development, rather than on its evaluation. Indeed, we fully agree that this “second way” needs to be addressed specifically. However, we unfortunately have to admit that such evaluation with students could only be done in the next summer semester 2016. We hope to meet your understanding and

C6201

support regarding this comment. In case you think the evaluation is necessary for a final (potential) acceptance of the paper, we would need to withdraw our manuscript.

Attached, you will find detailed response to the reviewers ‘comments and a revised version of the manuscript (with and without change track).

With best regards,

On behalf of all co-authors, Alice H. Aubert
