

Interactive comment on “The socio-ecohydrology of rainwater harvesting in India: understanding water storage and release dynamics at tank and catchment scales” by K. J. Van Meter et al.

K. J. Van Meter et al.

nandita.basu@uwaterloo.ca

Received and published: 16 February 2016

Manuscript is written well, and acceptable for publication except few comments.

Thank you.

1. In the text, Figure 11 has been cited (Line 10; page 12143), while only total 10 figures have been provided (page 12165). Please correct.

Will do. Thanks for noticing.

2. Line 27: After D. L. McLaughlin, there should be a full stop (.). Prior to Data analysis, no breaks.

C6785

Will do

3. Reviewer suggests authors to revisit the manuscript to correct syntax errors.

Will do

4. In general, manuscript is written well, and provide in-depth insight of rainwater harvesting system. 5. Reviewers also suggest adding some additional references: Rockstrom et al. (2009); Rockstrom et al., (2002); Pandey et al. (2013); Pandey et al. (2011); Va der Zaag adn Gupta (2008); Mialhe et al. (2008). These all studies are very relevant to this articles, and deserve citation. Mialhe et al. (2008) did explore the a similar research in South India.

Thank you for the suggestions. We will add the references.
