

Interactive comment on “Transport at basin scales: 1. Theoretical framework” by A. Rinaldo et al.

A. Rinaldo et al.

Received and published: 21 November 2005

Enclosed please find (loaded via the proper machinery) the revised version of the manuscript above. The reviews have been very thoughtful and instrumental to our revision. As a result, we feel we have to thank you and the reviewers for a commendable job. Overall, we have complied with the requests provided by the reviewers. Detailed comments and the list of changes to the manuscript follow as an attachment.

We feel that the paper is now ready for publication in HESS. Let me remark once more that the commitment, quality and timing of the editorial work has been excellent.

Best Regards
