Reply to Referee #4

All authors feel they have to thank this reviewer for his thorough review work and the interest in the paper.

A detailed answer to the specific comment by Referee #4 is reported below. Italics refer to the reviewer's comment, our rebuttal right below.

Please indicate why site A or node A represent an "inner" gauging station....

Inner is an improper reference - it is the site where we have the gauged data. We have removed the term in the revised text.

In Tab. 2 season-dependent values for overall porosity and overland velocity

in agricultural areas are given. Please spend a few words to explain where these seasonal differences come from.

Agree. A more detailed explanation has been added on the text.

All other recommendations have been met.
