Received and published: 9 May 2005

I am glad that the comments by the Referees and myself seem to have provided useful suggestions to the authors. Their reply to the Referees' remarks is to the point and based on convincing arguments. I suggest the authors to prepare a final version of the paper, that will be re-reviewed by myself. I believe that a revised manuscript, that incorporates all the changes mentioned by the authors in their reply, could be a valuable contribution for HESS.
