Dear authors,

thank you for your comments at Sept.10 and your question on October 8, how to proceed with your paper.

However, I have to make clear to you, that the replies to the reviewer's and my comments involves more than saying that you agree. You have to make substantial changes and additions to the document and write in a letter how you have precisely addressed the comments.

Discussion Paper

I give you the opportunity to submit a final and improved manuscript to HESS. But if the paper does not address the concerns properly, the paper will be turned down. After your possible re-submission I will ask the referees to give their final assessment.

It is now your decision if you want (and can) submit a revised version of the manuscript in a way addressing properly the reviewers comments.
