Received and published: 30 September 2006

Dear Dr. Pohlert, Reading the comment published by Ref#2 and your response, I was wondering if it was possible for you to provide a copy of your paper which seems to be very relevant to the your manuscript under discussion. If you think this could be possible please contact our editorial office for permission to upload "supporting document". If you choose to do so, I assure you that the manuscript will be kept strictly confidential and will be only used by the editor as supporting evidence to aid in the final decision. This is simply a suggestion and you may wish not to share the information
