The authors provided a carefully edited new version taking into account most of the comments provided by the HESS community as well as HESS reviewers and editors. I am pleased to recommend final acceptance of this manuscript to be published in HESS. I take the opportunity here to thank all the participants and especially the authors for what has been a very stimulating discussion. Further comments will reach the authors soon along with the official notification through the Copernicus manuscript management system. Again thanks to all and looking forward to reading you all in
