

Interactive comment on “Uncertainties in land use data” by G. Castilla and G. J. Hay

G. Castilla and G. J. Hay

Received and published: 11 October 2007

We completely agree with Dr Siebert comment that under our definition, the uncertainty level is user-specific.. To make it explicit we have added the following two sentences after the definition of uncertainty:

"We note that under this definition, uncertainty is not only dependent on the data but also on the user. The same dataset can be regarded with different degrees of distrust depending on how it will be used."
