

Interactive comment on “Self-similar pattern formation and continuous mechanics of self-similar systems” by A. V. Dyskin

Anonymous Referee #1

Received and published: 25 July 2006

I've been through the manuscript and it's OK. It's tutorial-like and a summary of some past works. I wouldn't say that it's particularly appropriate for the journal in question, but I understand that it's a special issue (Section 6 on permeability does read as an extension of convenience). Before publication, the English needs to be improved in places.
