Received and published: 22 October 2007

Dear authors,

all three referees stated that your contribution is interesting and significant (although not in every part novel) and worth for publication in HESS. However, all referees also stated that a number of corrections is required with respect to grammar, structure and content of the paper. Based on the reviews I would like to ask you to prepare a revised version of the manuscript as proposed in your author comment. Please submit the manuscript via the HESS online system again. In addition, please provide a covering

letter in which you state where and in which way you considered the suggestions of the referees (or why not).

I am looking forward to receiving the revised manuscript. Helge Bormann.
