Received and published: 27 January 2008

Dear Authors, I read again your original paper, the referees' comments, along with your replies. You addressed the main comments of the referees, but in a few parts your replies may give the impression to oversimplify or lower the relevant comments. Although the referees put forward their comments in a very constructive way, they raised important criticisms requiring some major revisions of the original contribution. I agree with the referees, and therefore please take due account of referees' comments when submitting the new paper and give appropriate justification in the cov-
