

Interactive comment on “Assessing the biodegradability of terrestrially-derived organicmatter in Scottish sea loch sediments” by P. S. Loh et al.

H. Savenije (Editor)

h.h.g.savenije@tudelft.nl

Received and published: 4 March 2008

I think the authors should seriously consider if they want to submit a revised version. I am not impressed by the reaction to the serious issues raised by the referees. The replies are perfunctory and difficult to follow. Both referees state that the paper is qualitative, not clear and not very innovative.
