

Interactive comment on “Importance of stream temperature to climate change impact on water quality” by A. Ducharne

S. Barles (Editor)

sabine.barles@univ-paris8.fr

Received and published: 10 March 2008

Two reviews of the manuscript have now been achieved and published as "Referee Comments" in HESSD. I hereby acknowledge the referees for their work and valuable comments. They both agree in finding this paper very interesting and innovative, and suitable for publication in HESS. Based on these evaluations and my own reading of the manuscript, the latter is accepted for publication in the special issue "Man and river systems: Long term interactions between societies and nature in regional scale watersheds" with minor changes.

The author is asked to write an "Author Comment" within 4 weeks to respond to the referee comments and attributed short comments if any, and to submit a revised version
