

Interactive comment on “A spatially distributed analysis of erosion susceptibility and sediment yield in a river basin by means of geomorphic parameters and regression relationships” by S. Grauso et al.

S. Grauso et al.

Received and published: 25 June 2007

I wish to thank the Editor very much for giving us the possibility to submit a revised version of the manuscript. It will ask us a three months - period to provide a complete revisioned paper in which we will try to meet all the Editor's prescriptions. We consider the occurred discussion about our paper and the observations from referees very valuable and stimulating for our work, so, we judge positively this experience.
