

Interactive comment on “The dynamics of cultivation and floods in arable lands of central Argentina” by E. F. Viglizzo et al.

Anonymous Referee #1

Received and published: 3 October 2008

In the fourth point of my review there is a typing error. In fact, the authors compare % cultivation during the inter-flooding period (1989-1995) and groundwater levels during the flooding period 1996-2003. They should better explain what is the physical reason behind this graph and why variables like landuse and groundwater level in different instant in time should be correlated.
