## ***Interactive comment on “HESS Opinions “The art of hydrology”<sup>1</sup>” by H. H. G. Savenije***

**H. H. G. Savenije**

Received and published: 12 January 2009

I particularly welcome the comment by Reusser et al., who launched the excellent idea to set-up an 'open source hydrological software repository' from which hydrological models can be built tailor-made to reflect the dominant rainfall-runoff mechanisms, without running the risk of unnecessary duplication or the creeping-in of programming errors and bugs. Such a repository would be a useful resource for all modellers.
